BRIDGING THE GAP BETWEEN SCIENCE AND PRACTICE IN THE ADDICTION FIELD

The International Society of Addiction Medicine's (ISAM) 12th Annual Conference under the theme "Bridging the gap between science and clinical practice in the Addiction field" will be held at the University of Milano-Bicocca in Milan, Italy, October 4-7, 2010.

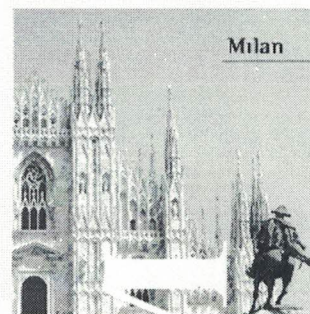

Ours is a young and dynamic university, which in the space of ten years has created an extensive network including many world-famous universities, research centres and top corporations.

The conference aims to provide physicians and allied health professionals who treat patients with substance use, a high-quality, comprehensive overview of all evidence-based findings currently available.

ISAM Milan 2010 will focus the latest scientific developments in addiction medicine and addiction psychiatry. The meeting is structured to encourage international interaction between clinicians from multiple disciplines, schools of thought, and settings.

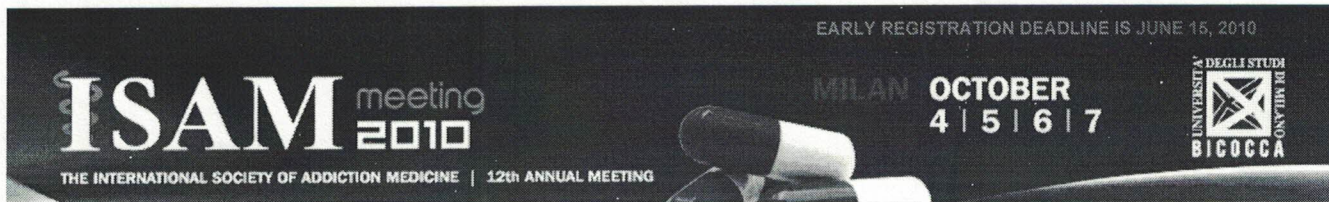

Conference events include plenary lectures, symposia, workshops, and poster sessions showcasing new research in the field.

The official language of the Congress will be English. Simultaneous translation into Italian will be provided for plenary lectures, and selected symposia.
